

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name _____ Bits not Bytes _____

Your Name _____ Minhazur__ Rakin _____

Your Team Member's Name _____ Bacem Karray _____

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

I did iteration 1a, 1b and most the entirety of Iteration 3. I transitions the snake to it's object oriented nature so that the growing feature can be implemented when the snake eats food and the player losses when the snake collides to itself.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

My partner did all of Iteration 2, helped me with Iteration 1b and implemented the score feature for Iteration 3. We both worked together to ensure 0 memory leaks.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

I noticed that texts are a good form of communication but for work to get done calls are a mandatory.
